SUBJECT: **Madison Metropolitan Sewerage District to host customer and community meeting**

MADISON, WIS. – Challenges with extreme weather, pollution prevention and the need to reinvest in the region’s water infrastructure require shared decisions.

To help prioritize efforts and develop community-oriented solutions to these and other issues, Madison Metropolitan Sewerage District will host a customer and community meeting March 20 from 7:30 to 9:30 a.m. at the district’s Maintenance Facility, 1610 Moorland Road, Madison, 53713.

“Water defines our way of life in south central Wisconsin and it’s also fundamental to our mission at Madison Metropolitan Sewerage District as we work to protect public health and the environment,” said Michael Mucha, the district’s chief engineer and director. “Back in 1930, area community leaders came together to create a regional sewerage district as one means to protect the region’s surface waters and support the growing economy. Today, we face additional challenges and we’re eager to work with community leaders to improve understanding of the issues and establish shared priorities.”

Prior to the meeting, which is free and open to the public, community members with an interest in water quality and regional infrastructure issues are encouraged to complete a brief (4 minutes) online survey to help inform the discussion. [TAKE SURVEY](#)

The meeting itself will feature an overview of key issues as well as impressions gained from the informal survey. Following the overview session, public officials from the district’s 26 customer communities will participate in facilitated discussions to identify priorities and potential paths forward. Members of the public with an interest in attending are asked to register for the meeting. [RSVP HERE](#)

More information is available by visiting madsewer.org and searching “[customer and community meetings](#).”

ABOUT THE DISTRICT

Established in 1930 to protect the lakes and streams of the upper Yahara watershed, Madison Metropolitan Sewerage District today serves 26 Madison area customer communities covering some 184 square miles and 380,000 people. The district owns and operates 141 miles of pipe and 18 regional pumping stations that convey approximately 41 million gallons of wastewater to the Nine Springs Wastewater Treatment Plant each day. Organized as a municipal corporation, the district is a leader in sustainability and resource reclamation; its rates are established by the Madison Metropolitan Sewerage District Commission.
