2020 Annual Report

On June 23, 2021, District staff filed the annual report with all parties as required by WI State Statutes 200.11(1)(e).

- (e) Annual report. The commission shall prepare annually a full and detailed report of its official transactions and expenses and of all presently planned additions and major changes in district facilities and services and shall file a copy of such report with the department of natural resources, the department of health services and the governing bodies of all cities, villages and towns having territory in such district.

Annual Report Requirements

To meet the requirements the report is broken into 3 sections:

About the District

Department Summaries

Financials

Annual Report Reinvented

- In recent years, staff adopted a consistent format that focuses on requirements.
- The reinvented annual report reduced work effort by taking a once time-consuming task and making it more of an administrative revision from year to year.
- In years past, staff provided an additional executive summary to our required stakeholders. In 2019, staff learned through survey results they were not reading the report. In light of these findings and in consideration of workload, and the lag creating this additional report had on the official annual report, the executive summary is no longer produced.
