

LOWER BADGER MILL CREEK INTERCEPTOR UPDATE

ISSUE NO. 4

Madison Metropolitan Sewerage District

NOVEMBER 23, 2022

www.madsewer.org

This publication was prepared by raSmith on behalf of the Madison Metropolitan Sewerage District (MMSD) to keep citizens informed about the Lower Badger Mill Creek Interceptor Project

Project History and Overview

Representatives from MMSD, Town of Verona, City of Verona, and City of Madison met in 2001 to discuss planning for sewerage service in the Lower Badger Mill Creek drainage basin. This basin includes parts of the far west side of Madison, the Town of Middleton, the Town of Verona, and the City of Verona. It was determined that the best way to serve the basin was with 30,000 feet of sanitary sewer interceptor pipe (see 2004 map on Page 2).

The preliminary design of the entire interceptor pipe was started in 2004 and completed in 2006. The upper 12,000 feet of the regional interceptor was constructed by the City of Madison in 2015 and 2016. The lower 9,500 feet was constructed by the District in Phases 1 through 4 from 2006 to 2018.

This project (Phases 5 and 6) will complete the final middle 8,500 feet of the interceptor pipe. When complete, the new interceptor pipe will enable the decommissioning of a temporary City of Madison sanitary sewage pump station (also called a lift station) at Midtown Road. While a preliminary design has already been completed, the District is revisiting the Phase 5 and Phase 6 preliminary design to incorporate current stakeholder feedback and additional project data.

General Route and Anticipated Schedule

The Phase 5 project will run from County Highway PD to Shady Oak Lane and includes approximately 3,200 feet of interceptor pipe. Construction of Phase 5 will take place in Spring/Summer 2023. Phase 6 will include 5,300 feet of interceptor pipe from Shady Oak Lane to Midtown Road. Construction of Phase 6 will take place in 2024 (See Page 3).

Project Website and Project Updates

Interested parties can view project information and sign up for project updates on the project website.

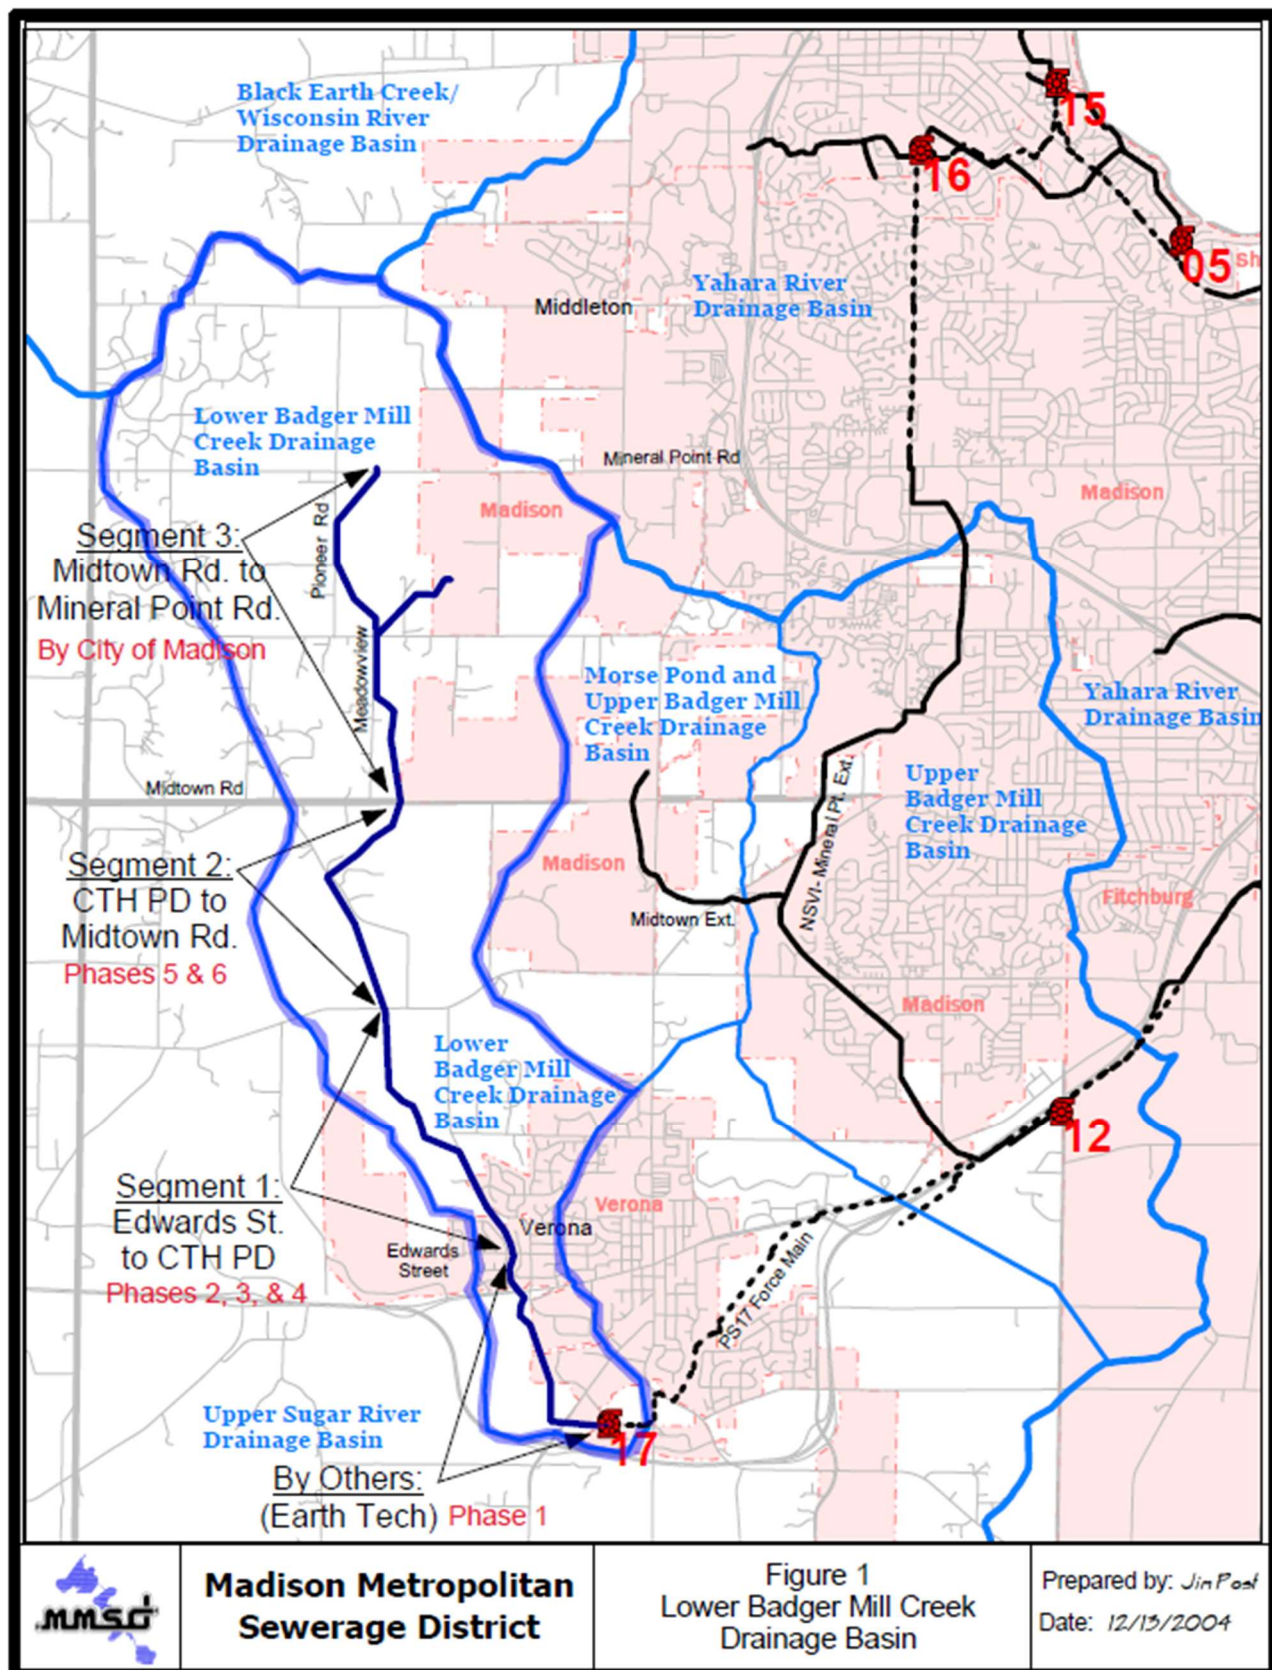

The project website is located at:

Public Open House

MMSD will be holding a public open house at the Town of Verona Town Hall (7669 County Highway PD, Verona, WI 53593) on December 8, 2022, from 5:30 -7:30 PM. Interested parties are welcome to review the 2005 preliminary design documents, talk with the project team, and provide input. Aerial photographs, site maps, and comment forms will be available to provide feedback. There will not be a formal presentation, so feel free to come any time from 5:30 to 7:30PM.

We look forward to seeing you at the Public Open House!
